

AXIA TP

Delivering the Power of IP

Axia Advantage Hosted IP PBX

Hosted IP PBX – Secure IP PBX Cloud Services

The Axia Advantage Hosted IP PBX is a market leader in cloud based PBX systems. With deployments worldwide, the hosted PBX service delivers unparalleled customization and flexibility, redundancy from cloud based servers, easy to operate web GUI (Graphical User Interface), improved scalability, and unrivaled security.

Hosted IP PBX services in the cloud can reduce operating expenses on a telephone system by as much as 40% annually. In addition to the cost saving measures, there are no complex hardware components that require maintenance or onsite support to operate.

The Axia Advantage IP PBX is a fully integrated, customizable platform with features like: voice-mail to email, fax to email, on-the-fly conferencing, full featured reporting, recording, as well as Outlook and mobile integration.

Beyond The Competition

- Highly Customizable
- Incredibly Scalable
- Powerful Call Reporting & Call Tracking
- Simple GUI Based Management Console
- Simple End User GUI
- Site-Site Extension Transfers
- 3rd Party Phone - Handset Interoperability
- Find-me / Follow-me
