

AXIA TP

Delivering the Power of IP

Dedicated T1 Service

Dedicated T1 – SLA Backed Secure Internet Connection

Axia's Dedicated T1 service is available throughout the U.S. and provides guaranteed bandwidth connections over dedicated copper links. The Service Level Agreement (SLA) backed offering has 24x7x365 "live" monitoring and is the premium business class solution for reliability, speed, and privacy.

Any Dedicated T1 purchased through Axia also comes with a secure customer portal where you can login and view real time network statistics and overall connection uptime.

Axia's Dedicated T1 service can deliver you the power and uptime to ensure your business is connected and stable around the clock. In addition to the traditional T1 service offering, Axia provides bonded T1 solutions for increased bandwidth needs as well as other dedicated connections like: Metro Ethernet, Fiber, and DS3 service.

Beyond The Competition

- Dedicated Bandwidth
- Secure Connection
- Proactive Network Monitoring
- Live 24x7x365 NOC Support
- Streamlined Client Monitoring Tools
- Secure Customer Portal Management
- Free 6 block of IP's
- DOS/DDOS Detection and Isolation

Technology Solutions That Deliver Value For your Business
