

AXIA TP

Delivering the Power of IP

Fiber Construction

Fiber Construction – Empowering Network Ownership

Axia's Fiber Construction Division is comprised of certified fiber optic engineers, laborers, and contractors; all managed by Axia project management staff and regional jobsite foremen.

Whether you need: splicing, directional boring, trenching, fiber project consulting, general project management, engineering, or finalized as-builts, Axia can deliver a customized solution for your needs.

In addition to staffing all of the appropriate resources, Axia cares for the entire build process as well as all federal, state, and local permitting, pole attachments, easement assessments, and outside plant services.

For more information on Axia's Fiber Construction services call 1.866.459.5360 opt 1 then opt 3 or you may contact us via email @ sales@axiatp.com
