Fiserv : Kerauno UC Platform Now Provides Seamless Integration with Fiserv, Jack Henry, and Corelation

12/01/2016 | 10:01am EDT

Axia Technology Partners announced the release of version 1.3 of its Unified Communications platform Kerauno, which now provides seamless integration with banking core software services including Fiserv, Jack Henry, and Corelation. This new functionality can replace many existing systems such as bank by phone and interactive voice response enabling increased efficiency ratios for financial institutions.

Indianapolis, IN, December 01, 2016 --(PR.com)-- Axia Technology Partners (AxiaTP) announced today the release of version 1.3 of its award-winning Unified Communications platform, Kerauno. In addition to increased interoperability with Salesforce, this latest version features "Bank Connect," which enables banks and credit unions to seamlessly integrate Kerauno with core banking services from Fiserv, Jack Henry, and Corelation.

"Banks and credit unions are always looking for ways to increase efficiency ratios," said Josh Ross, Managing Partner at AxiaTP. "By switching to Kerauno for their IP-based phone software, banks and credit unions can replace multiple systems such as bank by phone and interactive voice response with a single solution, saving them money and increasing their overall efficiencies."

First released in 2015, Kerauno has been gaining momentum as a Unified Communications platform, and was awarded "Best Cloud Solution" at the 2016 ITEXPO, as well as being named "2016 UC Product of the Year" by TMC. In addition to integration with Salesforce Kerauno's open API architecture provides seamless integration to any CRM or ERP software, as well as proprietary systems a company might employ.

Several banks and credit unions have already deployed Keruano and are realizing cost savings of as much as 40%, as well as increased
